About the Workshop

This one-week workshop is intended to train participants with basic & advance data analysis skills using SPSS to produce quality research work. The key focal point of the training is to identify the right statistical tools and techniques for different research objectives and to carry out data analysis using SPSS. The participants are expected to learn techniques about data entry and analysis in SPSS. Complete hands-on training methodology will be used, targeting on 'do how' rather than only 'know how'. The workshop will enable them to analyze & interpret the concerned data through SPSS.

Learning Outcomes

After undergoing this training program, the participants will be able to:

- (a) Understand fundamentals of data analytics, data handling, and related research issues
- (b) Use SPSS software for empirical estimations
- (c) Understand how data analysis can be used in classroom teaching and research publications.

Schedule of workshop

The workshop is **scheduled** from 6 pm-7.30 pm from 21st Feb (Monday) to 26th Feb (Sunday) 2022. However, participants can watch videos at their convenient time (since it is pre-recorded) and give the mock test as per their **Convenient time**. All the instructions, the link of the final exam, and the link for downloading the Softcopy certificate will be shared through the WhatsApp group only. There will not be any email confirmations. All queries will also be addressed through WhatsApp (M:08729913365) only. Participants can use the WhatsApp group discussion platform for asking any question related to the lectures and all valid questions will be addressed through a video.
